

SafeTec Fire Resistant Storage

File and Media Cabinets, Safes and Vault Doors

Product highlights

- Seamless construction provides tamper-resistant and fire-resistant secure storage.
- Premium insulating composite allows features such as thinner wall construction and recessed handles without sacrificing fire protection.
- Six standard colors, as well as custom color matching, meet the needs of any décor.
- All SafeTec products are Underwriters' Laboratories (UL) labeled and certified.
- Manufacturer's "After-The-Fire" FREE Replacement Guarantee stands behind SafeTec quality.

Incorporating our fire-resistant storage products into your company's disaster recovery plan can help prevent total devastation to your vital records and media.

We offer a complete SafeTec line of fire-resistant filing products – vertical, lateral and side tab cabinets – as well as media storage products. We also have fire-resistant vaults and vault doors to protect larger record storage areas.

All SafeTec products are built to exceed stringent requirements of Underwriters' Laboratories (UL) and undergo extensive testing to be sure that they provide the safety and security required in today's highly regulated marketplace.

All of our fire-resistant products have been poured with premium Insulite fire-resistant insulating material and are built to withstand as much as 1700°F and 2000°F explosion resistance.

While paper documents can withstand temperatures to 350°F, and be safely protected by our UL Class 350-1 hour rated products, computer media is damaged by temperatures above 125°F and 80% humidity and requires the added protection that our UL 125-1 hour rated products offer.

SafeTec Fire Resistant Storage

Side-tab lateral fire-resistant file cabinet.

Side-tab Fire-Resistant File Cabinets

Our HIPAA-compliant SafeTec Side-tab file cabinets are perfect for medical practices, and are designed and built for a lifetime of use. This product allows the user to access either legal or letter side-tab files with ease. The Side-tab file cabinet features a fully retractable door that swings up and out of the way to easily access side-tab files, or lowers and locks for completely enclosed secure storage. Available as a single stackable unit (up to four high), or custom configured as the top position of our 2-, 3- or 4-drawer lateral filing cabinet.

Vertical and Lateral Fire-resistant File Cabinets

Vertical and lateral fire and impact resistant file cabinets.

Our extensive line of SafeTec vertical and lateral fire-resistant file cabinets offers a convenient way to protect your vital business records. Available in a variety of colors, depths and sizes, our versatile cabinets can provide protection anywhere in the office. Optional interior accessories are also available, including caster bases, stackable trays and drawer-in-a-drawer inserts for small item storage.

Fire, Impact and Water-resistant File Cabinets

Superior American-made craftsmanship, our SafeTec file cabinets are also available in the Water-resistant Series, which incorporate a water-tight, high-temperature seal where the drawer head, outer wrapper and inner steel liner meet, creating a uniquely-designed water-resistant storage solution.

Record and Media Cabinets

Our record cabinets are UL Class 350-1 hour rated and come standard equipped with document storage shelves. Our media cabinets satisfy the more stringent heat and humidity requirements of media applications and are UL Class 125-1 hour rated. Both record and media cabinets are available with a variety of interior accessories and in heights ranging from 22-1/2 to 62-1/2". Choose the model that will best satisfy your needs.

All key-lock cabinets can be ordered with an optional digital or combination lock for the added protection. Our seamless and appealing construction with concealed hinges, handle and lock, combined with an attractive color selection – off-white and gray trimmed in charcoal – result in a contemporary and aesthetically pleasing look. Caster base and/or floor mounts are optional accessories on most models.

Media cabinet shown with a variety of optional interior accessories.

Record and Media Safes

A UL rating for fire, explosion and impact resistance accompanies every SafeTec safe. Available in five standard colors – gray, charcoal, off-white, tan, and putty – and a wide range of sizes and capacities to meet your specific storage needs.

All SafeTec safes are equipped with a Group 2 key-change combination lock and a UL certified relocking device to set the bolts if the lock is punched in a burglary attempt. Optional digital locks, x-ray proof locks, or key-locking combination dials provide added security against theft or espionage and are also available.

All of our SafeTec Record Safe interior components are constructed of welded steel and finished in attractive, durable air-dried enamel paint and can be used in a variety of functional configurations

If you require computer media storage, the SafeTec Media Safe may be your best solution. A variety of interior components allow our media safes to be customized to your specific application. These components can be easily changed as storage requirements evolve.

MediaCase

In today's rapidly advancing multimedia world, the need for protective computer media storage is a primary concern. The SafeTec MediaCase is efficiently designed for portability. The inside storage capacity is about 18% greater than that of similar products, but weighs 84% less – only 15 lbs. – and can be easily transported.

When the MediaCase is stored in a standard Class 350°-1 hour insulated fire or safe, it will maintain the necessary environment for media (below 125°F and 80% humidity). The compact size also makes it convenient to take your media with you.

Our MediaCase can also be placed into any paper document rated product for a comprehensive fire-rated storage solution.

Record and media safes available with a variety of optional interior accessories.

Record Safe offers optional side tab filing.

The MediaCase provides portable, safe storage for all media types.

SafeTec Fire Resistant Storage

Insulated vault door

Insulated Vault and File Room Doors

The strength and reliability of our Underwriters' Laboratories Standard 155 compliant Insulated Vault or File Room Door provides security anywhere an N.F.P.A.-rated fire-resistant vault is appropriate. The Insulated File Room Door could be specified in an instance where the construction of a fire-resistant vault is impractical, but maximum protection from fire is still warranted.

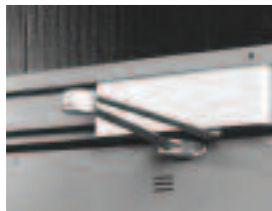

All SafeTec insulated doors carry a Class B Mercantile Burglary Insurance rating for security, Underwriters Laboratories, Inc. labels and certifications for times specified. The unique design of our door frame allows for easy, non-grout installation in walls 7 to 18" thick and a beveled vault threshold allows for easy passage of wheeled carts.

For further protection and safety, each door includes an inside escape mechanism, which can be easily located and operated, even in the dark. Two UL Standard 140 compliant re-locking devices automatically reset the lock bolt if the lock sustains tool or torch attack.
