

# Wire shelving

## Product highlights

- Durable, long-lasting carbon steel construction for a lifetime of use
- High-gloss, scratch-resistant electroplated nickel-chrome finish is attractive enough for display.
- Shelves are fully adjustable to handle an array of storage requirements.
- Open-wire design minimizes dust collection, maintains open air flow and requires minimal cleaning.

Versatile, durable and easily adjustable wire shelving is the perfect choice for your storage, display and material handling requirements. It is constructed of long-lasting carbon steel, which is finished in an attractive, scratch-resistant electroplated nickel chrome. Wire units assemble easily without the need for nuts and bolts or complicated tools.

### Shelf construction

The open wire construction permits air circulation, light penetration and requires minimal cleaning because less dust and moisture accumulates on shelf surfaces, an ideal feature for medical applications. Product is easily visible, making wire shelving an excellent choice for display purposes. Shelves are fully adjustable and are designed with wires running front to back to facilitate easy placement and removal of items without damage. Surface ribs are equally spaced on 13/16" centers and are made of durable 9-gauge wire. The front, back and sides of the shelf consist of a reinforcing truss of 6-gauge wire. At each corner of the shelf there is a conical collar made of 12-gauge cold rolled steel welded to the parallel rib supports. The collar is designed to accommodate the vertical posts.

## Wire shelving

### Flexible post design

Posts are made from 1" round tubing, 16-gauge thickness and are available in a variety of heights. They have rolled grooves spaced at 1" centers along their length. The post top has a finished plastic cap and the post bottom has a die-cast insert with an adjustable leveling foot to compensate for uneven floor surfaces.

Post height	Model no.
54"	P54C
63"	P63C
74"	P74C
86"	P86C

### Starter and add-on shelving units

Starter unit consists of 4 posts, 4 shelves and plastic shelf clips in the height and shelf sizes indicated below. Select from 4-shelf or 5-shelf units in a chrome-plated finish. The add-on units consist of 2 posts, 4 shelves, plastic shelf clips and two S-hooks for each shelf.

Shelf size	Model no.	Shelf size	Model no.	Shelf size	Model no.
14" x 36"	S1436C	18" x 48"	S1848C	24" x 42"	S2442C
14" x 48"	S1448C	18" x 60"	S1860C	24" x 48"	S2448C
18" x 24"	S1824C	18" x 72"	S1872C	24" x 60"	S2460C
18" x 30"	S1830C	24" x 36"	S2436C	24" x 72"	S2472C
18" x 36"	S1836C				

### Utility carts

Multi-purpose utility cart can store and transport your records boxes, medical supplies or other items. They are easy to handle and can be maneuvered through corridors and doorways without difficulty. Shelves adjust on 1" increments for added versatility.
